## Experience

---

### Web Developer

Feb 2023 – Current

Evolve Business Advisory, Oakville Ontario

- Built and maintained WordPress websites using PHP, HTML, CSS, and JavaScript
- Collaborated with a designer and senior developer to develop wireframes, mockups, and prototypes for new WordPress websites and features, ensuring that client needs and requirements were met and that the website adhered to best practices in website development
- Developed custom WordPress themes and plugins using PHP, HTML, CSS, and JavaScript to provide clients with unique and tailored website solutions

### Frontend Developer Internship | [Certificate](#)

Nov 2022 – Dec 2022

Frontend Simplified

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment
- Contributed to a dynamic and collaborative team of three, utilizing Agile methodologies to successfully complete projects during the internship and performed code reviews
- Actively participated in all aspects of the software development life cycle, including requirements gathering, design, maintenance, testing, and deployment

## Projects

---

### Sleek | [Website](#) | [GitHub](#)

React | JavaScript | HTML5 | CSS3 | REST API | GitHub | Git | Firebase | useContext

- Developed a social media app using react with the ability to post comments, like post and message.
- Utilized Firebase for real-time data storage and retrieval, allowing for dynamic and responsive updates to the user interface
- Implemented authentication through firebase and used context api for image uploads

### Tremors | [Website](#) | [GitHub](#)

HTML | CSS | JavaScript | React (Hooks & Routing) | APIs

- Managed a team of 3 to create a React project with Firebase and React allowing users to view earthquakes in the last 24 hours
- Utilizes 2 APIs calls through axios to plot earthquakes on a vector map, assign heroes and log vacation days to Firebase

### Dil's Game Shop | [Website](#) | [GitHub](#)

React | JavaScript | HTML5 | CSS3 | REST API | GitHub | Git

- A mock e-commerce gaming store built with React and RAWG API
- Users can browse game products by category and add products to cart. Users can also sort games by rating and price

## Education

---

### Juno College of Technology

Aug 2022 – Nov 2022

Web Development

**Relevant Courses:** Advanced Website Design, Agile Software Development

## Technical Skills

---

**Languages:** HTML5 | CSS3 (+ SCSS, BEM) | JavaScript ES6+ | JSON | AJAX | RESTFUL API | PHP

**Frameworks:** React (+ hooks) | Material-UI | Bootstrap | Node.js (basic) | Angular | TypeScript | Wordpress | Woocommerce | WP Bakery | Gravity Forms

**Technology:** NPM | Git | Yarn | React dev tools | Firebase v9 | GitHub | Jest | Google Analytics
